Project Name: Product Inspector

Team Member	Leon Wong, Yati Salleh, Farid Puasa

Project Insights

Brunei Darussalam as an Islamic country signifies the importance of using products suitable for the mass audience and in most cases are given the highest priority. By creating a website (one main portal), it will provide insight for users regarding the legality (kehalalan) and the safety of a certain product sold exclusively in the country. The products will range from raw materials, consumables and cosmetics that are accessible to the public. Generally, it provides users with the best information and knowledge regarding the product at hand.

Goal of the system	Project Objective
The goal of the system is to provide users with a one stop platform which consists of product information in regards to the legality and safety of its use in Brunei Darussalam.	- Users are able to search for products that are available and accessible in Brunei. - The website will consists of the appropriate information regarding the product: - Name/Brand. - Country of Origin. - Ingredients list. - Legality of use and etc. - Preventing users from accessing unnecessary information that might be suspected or are self-diagnosed.

Focus Group

The public audience in Brunei Darussalam.

Project Name: Social Media (Facebook like)	
Team Member	Leon Wong, Yati Salleh and Farid Puasa

Problem Statement & Project Solution

The problem with existing social media like Facebook is that user show no interest in using the platform when their feed did not provide topic that appeal their audience and hard to navigate to a topic which they might have interest, which result both people and businesses to be inactive on these social media sites.

The solution to this problem is to keep a simplistic design and include the features to navigate through the website at ease.

Goal of the system	Project Objectives
The goal is to develop a social media where user can look for the relevant topic while navigating through the site without any trouble.	• Registration for user to use the platform • Suggestion to a business which user might be interested • Suggestion to people who have similar interest • Display a certain topic feed when user interact with filter • Notify user when business post an update which they follow • A forum for users to message
